SUMMARY

Passionate Golang Developer with 5 years in software development, mastering backend systems and microservices architecture. Proficient in creating scalable solutions, with an emphasis on Golang and cloud services. Developed a high-traffic e-commerce platform, improving speeds by 30% through efficient code and collaboration.

EXPERIENCE

Golang Developer

Momentum Tech

05/2025 - Present Phoenix, AZ

- Designed and developed scalable backend microservices using Golang, enhancing system performance by 25%.
- Collaborated with cross-functional teams, introducing new features that boosted user engagement by 20%.
- Participated in code reviews, ensuring adherence to clean code standards, reducing tech debt by 15%.
- Implemented CI/CD pipelines, decreasing deployment times by 40% and enhancing developer productivity.
- Resolved complex technical issues, improving troubleshooting process efficiency by 30%.

Backend Developer

Sunset Labs

06/2023 - 04/2025 Tempe, AZ

- Developed RESTful APIs and microservices with Golang, increasing request handling speed by 35%.
- Integrated third-party services, enhancing platform capabilities and adding new user functionalities.
- Optimized database queries and configurations, reducing data retrieval time by 20%.
- Worked closely with designers and product managers to define requirements and deliver optimal solutions.

Software Engineer

Atlas Innovations

07/2021 - 05/2023 Phoenix, AZ

- Engineered backend systems using multiple databases, resulting in 15% better data processing speeds.
- Contributed to planning sessions, offering software solutions that aligned with business goals.
- Enhanced application reliability through rigorous testing processes, reducing critical errors by 20%.
- Collaborated with frontend teams using Git for seamless integrations and continuous improvement.

PROJECTS

Open-source E-commerce Backend

Developed a scalable REST API for small online stores, increasing user request handling by 50%. github.com/AvaJohnson/EcomBackend

Cloud-based Microservices Scheduler

Created a tool for managing microservices on AWS, improving deployment efficiency by 40%. github.com/AvaJohnson/MicroScheduler

EDUCATION

Bachelor's Degree in Computer Science

Arizona State University

01/2018 - 01/2021 Tempe, Arizona

KEY ACHIEVEMENTS

Reduced Server Latency

Implemented caching strategies and improved server response times by 30%, enhancing user experience.

E-commerce Platform Optimization

Revamped the backend, resulting in a 25% increase in checkout transaction speeds.

Leadership in Product Release

Led a team for a major release impacting 10,000 users, achieving a successful and timely delivery.

Collaboration for New Product Feature

Worked with designers and engineers to launch a new feature with a 95% adoption rate within first month.

SKILLS

Golang

Microservices Architecture

RESTful APIs

Docker

Kubernetes

PostgreSQL
